

OpenLCB Technical Note	
Protocol Identification Protocol	
10/08/10	Preliminary

1 Introduction

Generally, the node designer will just provide a simple fixed value for the reply.

Error handling works automatically here...

2 Annotations to the Standard

5 2.1 Introduction

2.2 Intended Use

2.3 Reference and Context

2.4 Messages

CAN example in color

10 2.5 Interactions

2.6 Protocol Identification Values

OpenLCB is big-endian, so these have been assigned from the MSB of the 1st byte.
