

OpenLCB Standard	
Simple Node Information Protocol	
Oct 6, 2012	Preliminary

1 Introduction (Informative)

Minimal introductory material, only the stuff that's absolutely needed to understand the Standard.

2 Intended Use (Informative)

Any limitations to the area of use of the Standard.

5 3 References and Context (Normative)

Citations to other docs, as needed.

For more information on format and presentation, see:

- OpenLCB Common Information Technical Note

Cross link to ACDI.

10 Must appear in PIP.

4 (To Be Merged)

The node sending the SNI request must wait for the entire reply from the responder before sending another SNI request. (Included to simplify required logic in leaf nodes)
