1 Introduction (Informative)

This specification describes the format and allocation of OpenLCB node identifiers (node IDs). It is not specific to any wire protocol.

2 References and Context (Normative)

5   This specification is in the context of the OpenLCB-CAN … Specification, which specifies …

3 Format

An OpenLCB node identifier (node ID) shall be six bytes of eight bits each.

The order of bytes in an OpenLCB node ID shall be considered significant. The most-significant byte shall be transmitted first during communication operations. The most-significant byte shall
10   be written first (left-most in Western format) in any human-readable representation.

OpenLCB node IDs shall include one or more 1 bits.

4 Allocation

15

Below this is just a collection of pieces from other docs right now.
